*E-mail [b.casali@ids-spa.it](mailto:b.casali@ids-spa.it)*

- **Proposal:** Submitted in call FP7-ICT-2009-4
- **Status:** Contract in force
- **Grant Agreement:** Coordination Action
- **Timeframe:** from 1/01/2010 to 30/04/2012 (28 months)
- **Challenge:** ICT-2009-9-4: Strengthening Cooperation in ICT R&D in an Enlarged Europe
- **Objective:** Reinforce networking and achieve a better exploitation of European synergies in antenna research
- **Activities:** Secondments, Courses and Workshops
- **Number of partners:** 14 from 12 European Countries
- **Total cost:** 568.095,50 € (EC Contribution : 497.740,00 € )
- **Project URL:** [www.ict-care.org](http://www.ict-care.org) and [www.AntennasVCE.org](http://www.AntennasVCE.org)

The CARE Consortium includes 14 European Organisations, at top level of excellence in antenna research, from 12 European countries.

CARE aims at reinforcing the collaboration among the European Institutions involved in antenna research. This pan-European effort, focused on the New Member States, has the objective of improving the European excellence by supporting the cooperation and synergies among Institutions located in different countries.

In particular, CARE will provide:

- 1) **researchers secondments**
- 2) **international workshops**
- 3) **training courses**
- 4) **dissemination, by conferences and Internet.**

The CARE funding will also support the dissemination of the results within the enlarged Europe, in close cooperation with the European Association on Antennas and Propagation (see [www.EurAAP.org](http://www.EurAAP.org)).
